DETAILED ACTION

Allowable Subject Matter

1. Claims 1-16 and 18 are allowed.
2. The following is an examiner's statement of reasons for allowance: Claims 1-12 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 3 wherein the clock multiplier comprises the combination of a first clock multiplication circuit (31), an inverter (34), and an amplifier (35) for feedback-controlling the delay time of the first clock multiplication circuit (31) in combination with the rest of the limitations of the base claims and any intervening claims. Claims 13-15 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 8 wherein the clock multiplier further comprises a second clock multiplication circuit (86) which comprises a second voltage-controlled delay line (861) for delaying the output of the first XOR gate (813) and a second XOR gate (862) connected to the outputs of the first XOR gate (813) and the second voltage-controlled delay line (861) in combination with the rest of the limitations of the base claims and any intervening claims. Claims 16 and 18 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 6 wherein the first clock multiplication circuit (61) comprises a second voltage-controlled delay line (613) and an XNOR gate (614) in combination with the rest of the limitations of the base claims and any intervening claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
